

Sonnox Fraunhofer Codec Toolbox

Release Notes

MAC

OSX 10.6 or higher

AAX Native, RTAS, Audio Units & VST

iLok2 required

v1.1.0

Now displays MP3 file lengths correctly

Adds a new Copyright metadata tag in the Manager

Installer Filename: NATCTBM5v1.1.0.pkg

Release Date: 21/04/2016

v1.0.6

Manager

Now decodes correctly to WAVE

Now decodes correctly to AIFF

No longer crashes on launch if last-used audio device is unavailable

Fixed various minor font issues

Fixed inability to stream audio to some audio interfaces

Installer Filename: NATCTBM5v1-0-6.pkg

Release Date: 06/01/2015

V1.0.5

Settings are now initialised correctly from cache file

32-bit float files generated by Cubase can now be auditioned correctly

5.1 output path field no longer affects mono/stereo playback

No longer crashed when trying to edit metadata of files containing some iTunes tags

Installer Filename: NATCTBM5v1-0-5.pkg

Release Date: 11/11/14

V1.0.4

Plug-in

Bit rate setting reverts to default – Fixed

Erroneous resampling message for MP3 VBR

Settings un-sync when GUI is closed

Bitrate not restored on session load

Improved compatibility with Pro Tools 11

Input/Codec switch grabs keyboard focus (for Enter) when clicked

Added channel mapping options to input meter right-click menu

Manager

Updated AAC bit/rate/sample rate tables

Cannot encode 32-bit float AIFF to MP3 or AAC – Fixed

Manager is streaming audio to all audio devices – Fixed

5.1 file playback time offset – Fixed

Does not decode correct channel audio during 5.1 playback – Fixed

Manager creates its Prefs folder if none exists

Metadata section appears disabled when restoring cache – Fixed

Metadata presets now compatible with Pro-Codec

Crash switching from unsaved metadata edits to a file in a different folder – Fixed
Loading a Pro-Codec preset crashes Manager – Fixed
Updated installer
Metadata preset location updated
Prefs file names and locations updated
Installer Filename: NATCTBM5v1-0-4.pkg
Release Date: 16/10/14

V1.0.3

Plug-in

Installer does not correctly overwrite old plug-in bundles – Fixed
Codec selector bit rate 'refresh' issue – Fixed
Crash when switching to 5.1 if codec is mp3 – Fixed

Manager

Unable to store presets or cache with non-admin user – Fixed
Installer sometimes displays alternative location options – Fixed
Output filename extension duplicated when escaping edit– Fixed
Some characters not displayed in paths if they are surrounded by spaces – Fixed
Invisible folders affect the Folder Browser scan – Fixed
If an unsupported file is selected, the File List play/pause icon remains in play – Fixed

Installer Filename: NATCTBM5v1-0-3.pkg

Release Date: 01/11/13

V1.0.2

Plug-in

Broken symlink in plug-in bundle. AAX version not available on OSX 10.6.8 – Fixed

Manager

Incorrect encoded file info in MP3 VBR files – Fixed
Incorrect decoded duration for MP3 VBR files – Fixed
Multiple selection of different type files allowed when focus out of table – Fixed
Cannot encode files containing accented characters – Fixed
ClipSafe does not correctly trim WAVE/AIFF files of some bit depths – Fixed
Encoding MFIT files with Clipsafe can result in files showing clipping in AULab – Fixed
Folder Browser - Second time a folder is expanded, the tree does not update to show its child folders – Fixed
*Folders named *.wav cause issues –Fixed*
Writing image file to MP3 causes incorrect (large) output file – Fixed
Encoding AAC-LC 256 CBR results in incorrect sample rate – Fixed
Encoding AAC-LC 256 VBR results in incorrect bit rate – Fixed
Auto-load selected-for-processing file into Audition Section – Fixed
Increase MP3 ISRC tag character limit to 15
Cancelling decode overwrites an existing target file – Fixed
Error when modifying a selected file outside the Manager application – Fixed
Map Command/Control + R to 'Refresh Folder and File List' - Now implemented
Support for ISRC in AAC encoded files

Installer Filename: NATCTBM5v1-0-2.pkg

Release Date: 28/10/13

V1.0.1

Encoding some AIFF files to iTunes+ with Clipsafe may result in audio anomalies - Fixed
Metadata lock lost when batch encoding - Fixed

Installer Filename: NATCTBM5v1-0-1.pkg

Release Date: 27/09/13

V1.0.0

First release

Installer Filename: NATCTBM5v1-0-0.pkg

Release Date: 26/09/13

WINDOWS (7 & 8)

AAX Native, RTAS & VST

iLok2 required

v1.1.0

No longer crashes with Windows 10 and Studio One 3.1/Ableton Live

Now displays MP3 file lengths correctly

Adds a new Copyright metadata tag in the Manager

Installer Filename: NATCTBM5v1-1-0.exe

Release Date: 21/04/2016

v1.0.6

Updated installer only – No change to Plug-in or Manager

Resolves an issue where installer would report no iLok Licence Manager present - Fixed

Installer Filename: NATCTBP5v1-0-6.exe

Release Date: 15/07/2015

v1.0.6

Manager

Now decodes correctly to WAVE

Now decodes correctly to AIFF

No longer crashes on launch if last-used audio device is unavailable

Fixed various minor font issues

Fixed inability to stream audio to some audio interfaces

Installer Filename: NATCTBP5v1-0-6.exe
