OXFORD R3 DYNAMICS		RELEASE NOTES
Platform OS	Win XP / Vista / Windows 7	
Platform Host	VST	

R3 DYNAMICS 1-5-2-3020		12/07/10
Installer Filename	NVDYNP4v1-5-2.exe	
Pace Wrapper	Interlok v5.8.13	
The issues addressed in this release include:		
1. iLok Licence Check Although normally desirable, it is now possible to bypass the iLok Licence Check process during plug-in installation. This may prove useful where studio staff are preparing for a session before the authorised iLok is available. Some users have reported issues where the installer will not successfully locate and confirm the required iLok driver version. This feature will allow users to install the plug-in regardless, and afterwards re-install latest iLok drivers from www.ilok.com should this be necessary.		
New features included in this release include:		
1. 64-bit compatibility Plug-in now supports DAW's running in 64-bit mode via VST plug-in bridge. <i>Note : Not compatible with Cubase 5.1 (64-bit) and earlier, Nuendo 4.x (64-bit) and currently not compatible with Sonar 8.x (64-bit)</i>		

R3 DYNAMICS 1-5-1-229		29/01/09
Installer Filename	NVDYNP4v1-5-1.exe	
Pace Wrapper	Interlok v5.8.5	
The issues addressed in this release include:		
1. New format installer Checks for presence and version of iLok driver. Auto-detects 32/64 bit operating system and installs relevant v5.8.5 iLok drivers if required. Checks for presence of Microsoft Visual C++ 2005 redistributables and installs if required. Checks for presence of iLok with correct licence before allowing plug-in installation. <i>Avoids initial plug-in scan failure and resulting unavailability with some VST hosts.</i> Option to specify plug-in and preset installation directories from default, if required.		
2. Log file Installer-Log.txt file created during installation and stored in : Program Files\Sonnox\Oxford Plugins\Logs <i>Useful to Sonnox support engineers should installation fail.</i>		

3. Show Preset Name Path

Feature now fully operational

4. “No dither option” removed

As the plug-in internally uses double-precision processing before handing back to the host in single precision, dither must be applied prior to truncation to optimise noise performance.

5. Installer bug fix

Updated 25/6/9. Build number incremented to 233.
Installer failed to recognise Pace 5.8.10 as newer than 5.8.5.

New features included in this release include:

None.
