<b>Pace Wrapper</b>	Interlok 5.8.5	
<b>The issues addressed in this release include:</b>		
<p><b>1. New installer with latest iLok wrapper (5.8.5).</b></p> <p>Reports have been received from some users of the Inflator introducing an instability into the project, causing unexpected crashes both of the Inflator itself and other plug-ins. We believe this was caused by a bug in the iLok layer that caused imperfect unwrapping of the DLL. By re-wrapping with a newer version of the iLok wrapper this instability has been cured. This is the only change over the previous version. Fixed.</p>
