<b>The issues addressed in this release include:</b>		
<p><b>1. New format installer</b></p> <p>Checks for presence and version of iLok driver. Auto-detects 32/64 bit operating system and installs relevant v5.8.5 iLok drivers if required. Checks for presence of Microsoft Visual C++ 2005 redistributables and installs if required. Checks for presence of iLok with correct licence before allowing plug-in installation. <i>Avoids initial plug-in scan failure and resulting unavailability with some VST hosts.</i> Option to specify plug-in and preset installation directories from default, if required.</p> <p><b>2. Log file</b></p> <p>Installer-Log.txt file created during installation and stored in</p> <p>Program Files\Sonnox\Oxford Plugins\Logs</p> <p><i>Useful to Sonnox support engineers should installation fail.</i></p>		

### 3. Show Preset Name Path

Feature now fully operational

### 4. Installer bug fix

Updated 25/6/9.

Installer failed to recognise Pace 5.8.10 as newer than 5.8.5.

#### New features included in this release include:

None.

## INFLATOR 1-6-3-312

28/10/08

Installer Filename	NVINFP3v1-6-3.exe
--------------------	-------------------

Pace Wrapper	Interlok 5.8.5
--------------	----------------

#### The issues addressed in this release include:

#### 1. New installer with latest iLok wrapper (5.8.5).

Reports have been received from some users of the Inflator introducing an instability into the project, causing unexpected crashes both of the Inflator itself and other plug-ins. We believe this was caused by a bug in the iLok layer that caused imperfect unwrapping of the DLL. By re-wrapping with a newer version of the iLok wrapper this instability has been cured. This is the only change over the previous version.

Fixed.

#### New features included in this release include:

None.

## INFLATOR 1-6-2-307

29/07/08

Installer Filename	NVINFP3v1-6-2.exe
--------------------	-------------------

Pace Wrapper	
--------------	--

#### The issues addressed in this release include:

#### 1. Mono/Stereo anomalies in Wavelab 5/6.

Mono version of plug-in inserted on stereo master bus would display stereo meters and would revert to Mono when 'play' pressed.

Fixed.

#### 2. Mono/Stereo anomalies in Cubase & Nuendo.

If you were to import a stereo wav, and split it into two mono tracks, and insert an Oxford plug-in into the right channel's mono track, then the audio effectively bypassed the plug-in.

Fixed.

#### 3. Plug-in failed to load in some DAW applications.

Affected applications included SoundForge 9, Vegas 8, Audition 3, Wavelab 5 & 6.

Fixed.

**4. Installers.**

Installation of re-distribution dll's now optional.

**New features included in this release include:**

**None.**
