Sonnox Announces New Oxford SuprEsser Plug-in

ANAHEIM (WINTER NAMM BOOTH #201-18) January 17, 2008 –

Sonnox is excited to announce the imminent launch of its first new plug-in since the Company became independent in April 2007. The Oxford SuprEsser joins the existing range of highly regarded audio processing plug-ins in the Sonnox line-up.

The Sonnox Oxford SuprEsser is both a very highly-featured professional De-Esser and a Dynamic EQ at the same time. There is a simple mode for quick fixes, but also an advanced mode for increased functionality and fine-tuning. The combination of an intuitive FFT display and three listen modes enables the user to easily see and hear exactly where the problem frequencies are, allowing the rapid reduction or removal of the offending audio. As well as being able to trigger the full band compression, the offending frequencies can be carefully carved out. Since the SuprEsser can operate at all frequencies, ‘plosives’ and other annoyances can also be removed effortlessly, making it more than a simple De-Esser. Additional features include Automatic Level Tracking, Linear Phase Filtering and a Wet/Dry blend control for final balancing.

“The R&D and market research process for our next plug-in convinced us that there is room for a truly professional De-Esser,” says Sonnox Sales & Marketing Manager, Nathan Eames, “so it was an obvious move to fill this void with a fully spec’d, high-quality plug-in, which has actually evolved in the development process to become a whole lot more than a simple De-Esser. The Advanced mode, for example, which is essentially a Linear Phase Dynamic EQ, is extremely versatile - I can see it being used in a creative capacity as well as its more obvious corrective usage.”

Sonnox will preview the new Oxford SuprEsser plug-in at the Winter NAMM 2008 Show in Anaheim, January 17-20. Booth #201-18 (Room 201) 2nd floor. The company will award four Native Oxford 6-Pack bundle (worth \$1,250 each) in a prize drawing for show attendees and, special ‘NAMM Deal’ vouchers will be available at the booth

Platforms: Native – RTAS, AU, VST

Price: TBA

Estimated Shipping: March 2008
